Preserve Your Special Memories on DVD!

Do You Have Photos or Video Tape That You Worry Might Become Damaged?

Have Photos of Special Occasions and Want to Make Them More Interesting?

Preserve Your Special Memories on DVD! Make your home videos and photos fun and exciting to watch. Have them professionally edited, organized and burned onto durable high quality DVD's. I will edit your home videos, print or digital photographs into entertaining short movies. With your involvement, I will design and create a customized DVD.

Items That Can be Converted:

Photos - Prints or Digital, VHS, VHS-C, S-VHS, 8mm (also called Video8), hi8, Video8, Digital8, mini DV.

Why convert VHS to DVD? By transferring your home videos to DVD you will be able to enjoy a lifetime of memories, without the risk of deteriorating video quality, torn video tape, fading photographic prints or other damages that time and usage cause to your recorded memories.

Will my video look better than on tape?

It most cases yes! I use filtering to bring out the best possible quality, but there is only so much that can be done with very low quality video or aging tapes.

DVD Content:

Photo Prints (Scanned) to DVD - up to 300 (equals approximately 35 min on disc . Each additional print scanned is 25 cents extra (not to exceed 500 photo total per package). Digital Pictures to DVD - up to 500. Video transfer to DVD - Cost depends on length of tape

Music:

Each song is \$2 which is what we pay to download them and add them to the production. If you wish all the songs to come from one album, we will charge for only the cost of that album. If you wish to send your songs on a CD with the pictures, there will be no cost to add them.

Package:

Each package comes with full color DVD with title of your choose and either a clear case or a DVD case (with full color DVD Case Cover). One copy will be included for each DVD Authoring. Cost of each additional copy depends on the Package selection. \$5.50/ \$8.50.
